Dear Sir / Madame

I oppose to the Redress plan that have been put in place by the FTC, let me just say this I do not understand why anyone would want to put money back into something that was take and was never own by people who disillusion me from the very begin. Who's to say that the new development would want more money and give you a smaller lot.

There are many unanswered questions, and a lot of money was taken from us the consumer and the FTC job are to protect the consumer only, not put in place a plan, where you put more money into something that was stole from you. I just would like to say no, give everyone what theirs, the lots, their money and if they decide to reinvest with another developer then that on them.

Respectfully,

Johnnetta Beverly-Leefort
